AI/Data internship candidate spanning BI dashboarding and data engineering, generative AI integration (Vertex AI, Gemini, Firebase), and full-stack development. Built a Top 5 Finalist GovTech AI platform and an award-winning NLP chatbot recognized at an international education innovation competition.

EDUCATION

Asia Pacific University of Technology & Innovation (APU) Bukit Jalil, Malaysia
BSc (Hons) Computer Science, Artificial Intelligence Feb 2026 – Present
Diploma in ICT, Specialism in Data Informatics — CGPA: 3.62 / 4.0 Sep 2023 – Nov 2025

EXPERIENCE

Business Intelligence Analyst/Assistant — DAXONET Group (Part-time, Hybrid) Jan 2026 – Present

- Built and redesigned 6–10 Power BI dashboards translating client requirements into custom sales, stock, and purchase metrics beyond Autocount's native reporting, connected via an on-premises data gateway
- Rebuilt the company's public website for responsiveness and technical SEO/AEO/GEO performance, prototyping updates in Figma and managing deployment (WinSCP, FTP) and email infrastructure (SMTP) informed by competitor analysis and Google AI-powered ad campaigns
- Evaluated emerging AI agent frameworks and Model Context Protocol (MCP) integrations for internal R&D tooling

Data Analyst Intern — DAXONET Group Sep 2025 – Dec 2025

- Developed Power BI dashboards on Autocount SQL data, integrated into a mobile app for the client's internal operations team
- Validated and reported on datasets exceeding 5M+ rows to support business decision-making
- Gathered requirements directly from stakeholders and delivered client-ready BI solutions

PROJECTS

OurDigitalID — AI-Powered GovTech Citizen Assistance Platform Mar 2026 – Jun 2026
Finalist, Project 2030: MyAI Future Hackathon (Build with AI 2026, GDG on Campus UTM)

- Implemented the multi-agent AI system using Vertex AI and Google Gemini, handling intent routing, conversational assistance, and OCR-based document scanning and verification
- Built the React Native / Expo mobile app and companion web app, developing UI functionality and Firebase Authentication login flows
- Set up and deployed the full backend across Firebase and Google Cloud Console, including Firestore data sync and Cloud Run deployment, within a 4-person team

Ravana AI — Educational Chatbot on Malaysian Cultural Heritage Sep 2024 – Jun 2025
Best of Gold & Gold, Higher Institution Graduate Students category | EDU@Innovate 2025 International Education Innovation Competition (UPSI), endorsed by the Malaysian Ministry of Education

- Built a web-based NLP chatbot (HTML, CSS, JavaScript, TypeBot) teaching Wayang Kulit (traditional shadow puppetry) via interactive storytelling, quizzes, and a virtual museum
- Presented the project as an APU exhibitor at the Putrajaya Festival of Ideas, explaining its build and purpose to a public audience
- Recognized by the Vice Chancellor of UPSI for excellence in educational innovation

Press: [The Star](#) · [Citizens Journal](#)

Predicting Football Match Outcomes — Performance Analysis (RapidMiner) Dec 2024 – Mar 2025

- Built linear regression models on historical match data to flag outlier win-rate performances and quantify home-vs-away impact on results
- Compared goals scored and total passes as predictors of match outcome to identify key performance indicators

APU Automotive Service Centre (Java) Feb 2026 – Jun 2026

- Built a Java SE 21 desktop application (AWT/Swing) for an automotive service centre, supporting 4 distinct user roles — Managers, Counter Staff, Technicians, and Customers, each with tailored access rights
- Implemented appointment scheduling, payment collection, and customer feedback workflows backed by file-based data storage
- Generated PDF service reports and receipts using iTextPDF, contributing to a 139-commit team codebase

SKILLS

AI/ML & Cloud: Vertex AI, Google Gemini, Multi-Agent Systems, OCR, Model Context Protocol (MCP), Claude Code, Claude Cowork, Codex, Gen AI, Prompt Engineering, Google Cloud Platform, Cloud Run, Firebase (Auth, Firestore, Genkit), RapidMiner
Data & BI: Power BI, SQL, Microsoft SQL Server, On-Premises Data Gateway, Data Analysis, Data Visualization, Excel
Languages & Frameworks: Python, Java, JavaScript, HTML/CSS, React Native, Expo
Web & Marketing: SEO, AEO, GEO, Competitor Analysis, Google Ads (AI Campaigns), WinSCP, FTP, SMTP
Tools & Design: Git, GitHub, NetBeans, Figma, Microsoft PowerPoint, Microsoft Word

ADDITIONAL

Certifications: IBM AI Fundamentals (2026); Claude Code, Claude Cowork — Anthropic (2026); SQL for Data Analysis, Introduction to Data Analytics, Introduction to Microsoft Excel — Simplilearn (2025); Microsoft Copilot & GitHub Copilot Declarations of Completion
Languages: English (Native), Chinese (Native), Cantonese (Fluent), Malay (Elementary)
